**A PILATUS PC-12 IS NEWEST ADDITION TO AERO CHARTER FLEET**

*The mid-sized plane allows for reliability and versatility.*

(ST. LOUIS / January 14, 2012) Aero Charter, located at Spirit of St. Louis Airport (KSUS) in Chesterfield, Mo., has added a Pilatus PC-12 to its charter fleet.

This plane is the perfect balance of long range, large cabin size and low operating costs. The mid-sized, Pilatus PC-12 has a range of approximately 1,500 nautical miles and holds up to nine passengers. The turboprop plane is quite economical for its size and range, which makes the Pilatus an executive transport favorite.

"I feel our clients will really take to this option," said John Morgenthaler Jr., owner of Aero Charter.

Locally owned and operated since 1978, Aero Charter provides complete aircraft support services for business and private aircraft. The company offers worldwide flights with the majority of its clients flying throughout the United States, Canada, Mexico, the Caribbean and South America. The fleet includes jet, turbine and piston aircraft. In addition to charter, Aero Charter provides full aircraft support services including aircraft management, maintenance, avionics, and Fixed Base Operation (FBO) ground support. Aero Charter's avionics department specializes in custom installations and repairs. In 1995, Aero Charter introduced Aero Travel, a full-service travel agency. The recipient of numerous safety awards, Aero Charter recently expanded its facilities to include an additional hangar and expansive ramp area, which more than doubles its existing capacity.
